News and schedule of activities

NEXT WORKSHOP FRIEDMAN HAYEK CENTER – DR. ALEJANDRO CORBACHO – HYBRID MODE

The cycle of internal workshops of the Friedman Hayek Center continues with a presentation by Dr. Alejandro Corbacho. It will take place on Monday, May 16 at 3p.m. and will address the topic: “Evolución del Pensamiento Estratégico en las Relaciones Internacionales” (Evolution of Strategic Thinking in International Relations). We hope to count with your participation for this next date of the cycle.

The Friedman Hayek Center’s workshops this year will be held in hybrid mode. You will be able to attend them in person at UCEMA’s headquarters Av. Córdoba 374 or by connecting to the Zoom room which we will indicate nearer to the date of the event. We will be expecting you!

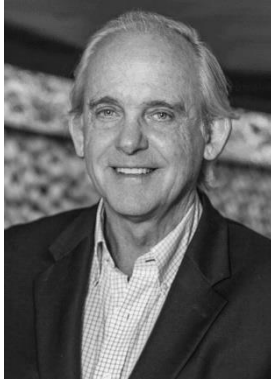

**NEXT SEMINAR FOR THE STUDY OF A FREE SOCIETY - DR. JULIO ELÍAS -
ONLINE MODE**

Today, Wednesday May 4, at 5 p.m. Dr. Julio Elías will present his research “Understanding Creativity: Innovators in Art, Literature and the Wine Industry of Argentina”.

The Economics of Creativity is based on the idea that the main source of variation in the creative process throughout the life cycle is not explained by differences between the different disciplines (e.g. History versus Art), but is due to differences between innovators within a same discipline (e.g. Picasso Versus Cézanne). The objective of the seminar is to provide a basis for understanding the types of innovators within a same discipline analyzing the different patterns of creative production.

We invite you to attend this original proposal by registering [here](#).

NEXT SEMINAR ON EDUCATIONAL FREEDOM – DR. MARTÍN KRAUSE –

ONLINE MODE

On Thursday, May 12 at 12.30 p.m. Dr. Martín Krause will present the paper “La educación como bien público” (Education as a public good) in the cycle of seminars on Educational Freedom.

The issue of education as a “public good”, has a more or less precise definition for economists. For the people, in general, a public good is that which is provided by the State, perhaps because it “benefits everyone”. Economists speak of a “positive externality”, that is to say, a benefit that everyone receives, whether or not they bear its cost. For that reason, the argument continues, the market would “fail” in providing it, at least in sufficient quantity, and the State must do so. There are two issues then, worth discussing: is formal education a “public good”? and, is it correct that the market cannot provide it?

You can register for this interesting seminar by clicking [here](#).

III ACTON CHAIR MEETING 2022 – TUESDAY MAY 3, 2022

Yesterday, the Academic Director of the Center, Dr. Gabriel Zanotti, offered a presentation entitled “Detalles de la imposibilidad de planificación central en economía» -Precios, aprendizaje, libertad de entrada, precios de consumo y factores de producción, camino de servidumbre” (Details on the impossibility of central planning in economics» -Prices, learning, freedom of entry, consumer prices and production factors, path of servitude”, within the framework of the III Acton Chair Meeting 2022.
